I am outraged to hear that the NAB is seeking to prevent satellite radio (like XM) to stop presenting traffic and weather. XM Satellite radio service is one of the best things I have ever decided to purchase. It provides variety and quality that I have not been able to find anywhere else. Also, I have opted to pay for satellite radio as a service. I should be allowed to decide what I receive and what I don't. This decision should not be decided by people who aren't subscribers. As a subscriber I have agreed to accept all the channels provided and I approve of all the content broadcasted (in the same way people pay for cable television have the right to watch what they want to and not have content dictated by others). I urge you to reject NAB's petition 04-160. The petition to limit XM Satellite radio feels like a petition against me. I have a right to pay for traffic and weather updates and hear those updates. Please do not allow NAB's petition 04-160 to be heard.
Thank you.
